DETAILED ACTION

1. Claims 1-24 are pending.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5 and 7-9, drawn to a non-human mammal comprising an exogenous human cytochrome P450 gene.

Group II, claim(s) 6, drawn to a non-human mammal comprising an exogenous human cytochrome p450 gene, wherein the endogenous p450 gene of the mouse has been disrupted.

Group III, claim(s) 10-11, drawn to a method for screening a library and preparing a map of the mouse Cyp3a genes on a chromosome.

Group IV, claim(s) 12-15, drawn to a targeting vector for deleting mouse Cyp3a gene, method of making the vector and a method of deleting the Cyp3a gene in a cell.

Group V, claim(s) 16-21, drawn to method of preparing a Cyp3a knockout mouse, the knockout mouse and cells and tissues of the knockout mouse.

Group VI, claim(s) 22-24, drawn to a method of producing biologically active human cytochrome P450.

3. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The transgenic non-human mammal of group I lacks the same technical feature as that of group II because art of record teaches a transgenic mouse expresses a human cytochrome P450 (Li et al. Archives of Biochemistry and Biophysics. 239:235-240, 1996) and therefore does not make a contribution over the prior art. Additionally, the transgenic non-human mammal of group II comprises a disruption in the endogenous gene of the mammal and therefore lacks the endogenous cytochrome P450.

The methods of groups III-V are directed methods that produce different products and have different steps and therefore lack the same technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
